THE FIRST-BRIDGEPORT NATIONAL BANK

CHARLES G. SANFORD, Pres.
F. N. BENHAM, Vice President
O. H. BROTHWELL, Cashier

ABSOLUTE SAFETY

This bank is easily accessible from all parts of the city and is, therefore, a most convenient depository. Because of its conservative policy and large capital and surplus, it offers absolute protection for all funds placed in its care.

NEWEST NOTES OF SCIENCE.

Horses seldom suffer from decayed teeth.

Japan is building her first home-made locomotive.

England has over 600 women doctors, of whom about 200 practice in London.

Twenty-seven great reclamation projects are now under way in the United States.

Gas engines are now in use for auxiliary purposes on a dozen British battleships.

A mixture of 15 parts of formaline, 2 of milk and 65 of water makes an effective fly poison.

Algeria prohibits the importation of medicines not authorized by the Paris Ecole de Pharmacie.

A new Swedish dirigible torpedo, operated by electricity, has a range of 5,000 yards and a speed of 30 knots at any depth.

Attendants in a New York Zoological Garden successfully filled 17 cavities in the teeth of the institution's largest animal.

China has taken up the manufacture of window glass, and the product, which is a novelty to the natives, is becoming popular.

A completely-equipped first aid hospital will be added to every passenger train operated in Prussia and Hesse by the Government.

The engineering department of the University of Michigan plans to add a course in navigation, provided enough interest be shown.

The Spanish river Guadalquivir is being widened and deepened to permit large vessels to reach Seville, 72 miles from the coast.

An Oklahoma carpenter has been granted a patent on an oil reservoir, the work of which is to slowly lubricate a wheel in use.

Gold, silver and copper have been discovered at the foot of the Sierra Nevada, where there has been mining of any sort on a commercial basis.

The work of construction on the first railway in the Western Hemisphere south of Mexico is progressing rapidly at Corral, Chile.

A physician connected with a hospital at South Bethlehem, Pa., uses his electric automobile to operate X-ray apparatus almost every day.

A London veterinary hospital has a new ambulance for dogs in the form of a kennel, mounted on bicycle wheels and drawn by a motor cycle.

A quick-witted American photographer in Philadelphia recently snapped an aeronaut as he was falling from his parachute, which had failed to open.

Several electric companies are being formed in Pennsylvania and other of the more densely populated States to supply light and power to farms.

Florida produces more phosphate than all the rest of the States put together, and only recently another extensive deposit, of high grade, was discovered.

The amount of petroleum produced in the United States in the last half century would fill the Panama Canal twice with a considerable amount left over.

The dripping of brine from refrigerator cars is said to cost one Western railroad \$400 per mile per year in damage to steel track and bridge equipment.

The largest electric transmission line in the world is the Niagara Falls to Syracuse and Auburn, N. Y., which carries 20,000 horsepower 163 miles.

The Institute of France has awarded the \$20,000 Olinde prize to Louis Elie and Gabriel Voisin for their experiments and achievements in aerial navigation.

An English firm is making salt by a patented process whereby the brine is refined before being crystallized. The product is claimed to be 99.95 per cent. pure.

Philadelphia's street cars are to haul their passengers for hours, the cars being controlled by air brakes manipulated by the motorman on the head cars.

A gasoline tractor, operated by one man and capable of doing the work of six horses is being offered to farmers at about the cost of a good pair of horses.

As rivals to or substitutes for the potato, efforts are being made to introduce the tropical vegetables of the tropics, and these are in several of the Southern States.

A canal across Scotland, the largest in the world to accommodate the largest warships, is being advocated as a military necessity, although it would cost in the neighborhood of \$30,000,000.

There are 123 American educational and charitable institutions in the Turkish Empire and the use of the language is rapidly extending into the interior, especially in Asia Minor.

The largest order for radium on record recently was placed in England. It called for one-quarter of an avoirdupois ounce for the Radium Institute, at a cost of about \$150,000.

The new "wireless" electric fan which is driven by a battery enclosed in its base, making it independent of the usual sources of current, was invented by a Philadelphia physician.

Although Alaska covers nearly 600,000 square miles there are but a little over 300 miles of railroad 452 miles of wagon road 397 miles of road and 255 miles of improved trail.

Steel car wheels turned out by a Pittsburgh company are called "noiseless" because they will last three to a half times as long as the old style ones, and are guaranteed not to wear flat.

Engineers are figuring on piercing Mont Blanc for a double track electric railroad. The tunnel would be eight miles long and would shorten the distance between Paris and Genoa over 30 miles.

A plan for world-wide weather reports by wireless, to increase the information available for forecasters, will be discussed at an international meeting of meteorologists in London next month.

At the present rate of increase in coal consumption in this country, the Geological Survey figures that all the coal of the world will be exhausted in the year 2040 and all coal a century later.

The Smithsonian Institution will erect a substantial observatory on the summit of Mount Whitney, Cal., to enable investigators to study the atmospheric conditions at a great altitude in dry, clear air.

Ten years ago contractors gave up as impracticable an attempt to tunnel under the Hudson river at New York. Now there are 14 such tunnels with railways connecting Manhattan with the opposite shores.

The electrification of the Grand Trunk Pacific Railway for the 460 miles between the St. Lawrence river and Montreal is being advocated to lessen the dangers of forest fires due to locomotive sparks.

The Smithsonian Commission is importing from Bermuda hundreds of small fish of a variety that lives on malaria-larvae to aid in its warfare on malarial and other diseases spread by the insects.

Scottish coal mine operators are experimenting with calcium chloride as a dust layer, sprinkling the runways

with a concentrated solution and introducing dry powder in seams where watering is impossible.

The fact that cables, wrecked by the Messina earthquake, and recently recovered from the sea, seem to have been burned off, is regarded as proof that the disaster was due to submarine volcanic eruptions.

To prevent prisoners from escaping while being transported from one place to another, a Californian has patented shoes containing spikes in the soles, which would enter a man's foot should he attempt to walk in them.

Experiments have convinced French scientists, that potassium should be added to the list of radio-active substances, that its small amount of radiation is due either to the element itself or to some unknown substance associated with it.

A Paris astronomer is arguing that the moon once had an atmosphere, basing his belief on the statement that the bright rays that extend from the principal volcanoes are due to volcanic ash, carried from the craters, when active, by the wind.

The water which the Government will impound in its great irrigation dam across the Rio Grande near Engle, N. M., will form a lake about 45 miles long, four or five miles wide and 175 feet deep in places, about double the quantity of water held by the Assouan reservoir in Egypt.

Called to Proctor, R. I.
Rev. C. F. Nixson, pastor of the Swedish Congregational church, in East Norwalk, has accepted a call to another church, at Proctor Rhode Island.

Reward of \$200.
A reward of \$200 has been offered by a member of the wealthy summer colony in New Canaan, for information as to who circulated the untrue report that a son, prominent in the social set, had been recently married to a New Canaan girl, recently discharged from the State Reform school.

Hit by Automobile.
Samuel Losin, of Danbury, a peddler of produce, was the victim of an automobile accident Friday afternoon while on his way home from Ridgefield. A large touring car, going toward Ridgefield, came upon him suddenly around a sharp curve. The car struck the vehicle and threw Mr. Losin from the seat. He fell between the wheels of the car and ran to Mr. Losin's assistance. Mr. Losin was taken to the Danbury hospital. An examination failed to disclose any broken bones. Mr. Losin suffered principally from nervous shock. He was unable to tell who the people in the automobile were. The number on the machine was 7590. According to the record of license bearing that number is owned by Frank C. Carley, of Ridgefield.

To Marry Chauffeur.
Since Miss Amelia, the only daughter of Karl Neundorff, of Sound Beach, packed her dress suit case, last Thursday night and went off to be married, her parents have not seen or heard from her. Miss Neundorff's stepmother said she had an idea that the girl was in Jersey City, living with the parents of the man she is said to have eloped with—Fred Lueders, a chauffeur. It would appear from a note she left for her father that she was not happy at home.

CASTORIA.

Torrington Man Robbed.
Delphin Rocher, a prominent French resident of Torrington, was robbed of \$250 Friday in New York City. He, with his wife, left for New York to sail for France. After visiting a restaurant before taking the steamer, he missed his pocketbook containing \$75 in currency and a check for \$350 payable in Paris. This was practically all the money he had. He had no tickets were in another pocket, so that with a temporary loan from a friend they were enabled to continue their journey. Rocher is a molder and for thirty years had been saving the money to make the trip.

Losses by Fire.
A barn owned by F. W. Bushnell of Winsted on the New Hartford road was destroyed by fire Friday night together with 20 tons of hay, four tons of rice and other contents. The live stock was saved.

Isaac Patterson's barn at Torrington which was burned on Friday afternoon, was insured for \$1,000 and the contents for \$400. The corn crib, which was also burned, was insured for \$100.

The farmhouse of W. D. Sheldon on the Weatogue road, Canaan, was destroyed by fire Wednesday afternoon. Sparks from the chimney are supposed to have been the cause. Some furniture was saved and there was a partial insurance.

Gets Securities Back;
\$15,000 Stolen, Returned
(Special from United Press.)
New Haven, Aug. 4.—When Dr. W. P. Hayes of the New Haven Dental Company opened a bulky package which he received yesterday by mail, he found a number of securities and mining stocks valued at \$15,000 which were stolen from his offices about a week ago. The package bore a New York postmark date and the burglars were evidently unable to dispose of them. Dr. Hayes is sure that he recognizes the handwriting.
